Ordering Instructions

When ordering, specify:

Enclosure Part Number, Enclosure Accessories — Cord Connector Kit, Hole Plug, Label Pack, **Control Inserts** — Pushbutton (One to Five Speed), Selector Switch, Pilot Light, Push/Pull, Toggle Switch, **Insert Accessories** — Interlocks, Rubber Button Covers, Molded Nut Wrench

Notes

- All inserts, except five speed M5G1, are single button assemblies. Two assemblies are required for each motion. M5G1 is a two button mechanically interlocked assembly.
- When assembled stations are desired, use assembled enclosure price, specify all components and top-to-bottom arrangement including nameplate markings.
- Consult local sales office for items not listed or for assistance in placing your order.

Type of Switch Symbol Key

- — Pushbutton Switch
- ⊙ — Selector Switch
- — Toggle Switch
- — Mushroom Head Switch

Notes

- Cannot be mechanically interlocked.
- All mushroom head inserts require #80325-104 molded clamping wrench for installation.
- 2 - M1GM inserts and 1 - MRI interlock required for maintained operation. Maintained and momentary buttons can be combined with MRI interlock.
- This is a two button insert with a mechanical interlock and 6 - N.O. sequential contacts per button. It is CSA approved only.
- Add-A-Block adds extra contacts to standard single deck buttons. However, they cannot be used with mechanical interlocks in pendants due to lack of space.
- See specification booklet for contact sequence.
