Ohio Ordnance Works, Inc. History

Robert I. Landies, the owner and founder of Ohio Ordnance Works, Inc. (OOW), has been involved with ordnance for over 45 years. Beginning in 1964, Mr. Landies started his career working at TRW in the jet engine division and eventually moved to the Navy torpedo division. Continuing as a collector and gun-smith of military firearms, he gained extensive knowledge in a variety of different weapon systems and designs during his seven years of military service with the U.S. Army in both active and reserve duty as an armor officer. In 1981, this knowledge was brought to bear through a full time business with the establishment of what is today known as Ohio Ordnance Works, Inc.

During the years 1981–1990, OOW engaged primarily in buying and selling military firearms, parts and accessories in the commercial market. Qualified employees and manufacturing machinery were added which facilitated the development of a repair department and the ability to build small orders of firearms from scratch for the commercial market.

In 1990, OOW began manufacturing firearms and ordnance for supply to different foreign and domestic government agencies. This capacity has expanded steadily over the years due to a wide base of weapon system knowledge, qualified personnel, state of the art machinery, new technology, and a commitment to excellence in both products and services.

OOW Today

Presently Ohio Ordnance Works, Inc. has a workforce of 45+ employees who work within the company’s 30,000 square foot facility located on four acres in an industrial park. OOW is currently supplying substantial amounts of small arms manufactured and modified for training simulators to U.S. Army Simulator Training Command, as well as providing light machine gun mounts and cradles to U.S. Army Tank Command. OOW is fully licensed to accommodate all aspects of manufacture, sales, and distribution both domestic and overseas, of any ordnance commodity.

Notable Customers:
The OOW249 is the belt-fed, air-cooled, fully automatic machine gun currently deployed by U.S. and international forces. Since the invasion of Panama in 1989, the S.A.W. has proven itself in every major U.S. conflict.

In 1984, the S.A.W. system was found to be the most effective candidate to address the need for more firepower in small units. For over 20 years, the OOW249 has seen every possible condition and environment and continues to come out on top.

The OOW249 S.A.W. provides infantry with the heavy volume of fire of a machine gun combined with accuracy that begins to approach that of a rifle. It fires the NATO standard 5.56mm cartridge, and is capable of engaging targets out to 800 meters.

Ohio Ordnance Works, Inc. (OOW) is proud to offer the S.A.W.:

- Consistent, reliable, on-time delivery achieved with ISO certified multi-tier inspections
- Ready for battle right out of the box- Tested for functionality and accuracy at the factory
- Risk Free Purchasing with our "no nonsense" parts and workmanship warranty
- Be prepared for any environment or scenario- Multiple Configuration options allow you to customize to a unit's specific needs

With the addition of the OOW249 S.A.W. to our production line, OOW has evolved to provide the customer with a single source for their Crew Served Weapons needs.

OOW249 shown in standard configuration with fixed, recoil-absorbing buttstock, heat-resistant handguard, heatshield and bipod for fixed position firing.
The current issue US military medium weight machine gun, the OOW240, is a belt-fed, air-cooled, crew serve machine gun system capable of sustained and accurate suppressive fire that far surpasses its predecessor, the M60.

The United States Armed Forces have been using the OOW240 since the mid-1980s. It was first used in a vehicle/coaxial role, but was popular enough to be adopted by the infantries of both the United States Marines and the United States Army during the 1990's.

The OOW240 has proven to be more durable in tests and in the field than the M60. It fires a 7.62mm round, and the NATO standardization offers unique benefits in terms of training, logistics and joint operations.

Providing a competitive and superior quality alternative, Ohio Ordnance Works, Inc. (OOW), offers a complete OOW240 medium weight machine gun package. All special tools, barrels, internal parts, depot level repairs and rebuilds are available upon purchase of the OOW240 Gun System with all versions, available at time of order.

- Grazing Fire: 660 yards (600 meters)
- Cyclic Rate of Fire: 650–950 rounds per minute
Ohio Ordnance Works, Inc. (OOW) is pleased to offer our unique, re-engineered, belt-fed, semi-auto version of the M240 Machine Gun. The M240-SLR (Self Loading Rifle) is a combination of original M240 parts designed and manufactured by OOW.

Delivering minute-of-angle accuracy, high capacity, and proven durability, this weapon is ideal for situations which require highly accurate, sustained, controlled fire.

Like the M240, the M240-SLR fires a 7.62mm NATO round. However, unlike the M240, the M240-SLR has been redesigned to fire from a closed bolt.

In field tests, using match ammunition, a randomly chosen weapon effortlessly produced minute-of-angle (1") groups at 100 yards. In both single and rapid fire (400 rpm) tests, absolutely no malfunctions were experienced with the gun... a true testament to its superb engineering.

The M240-SLR is dimensionally identical to the M240, and is able to integrate into any M240 mounting system. The internal parts have been redesigned and are all manufactured by OOW at our ISO certified facility to the highest standards of quality.

Semi-automatic only M240 SLR has the same external dimensions and easily fits into mounts designed for its full auto cousin.
**M240 Select Fire**

The M240 Select Fire Trigger Pack is a practical improvement for the M240 weapon system. This patented trigger pack design offers instant select fire capability with no hassle. Simply remove the original trigger group and install the new Select Fire Trigger Pack into your M240 weapon system.

The easy-to-use design features a thumb operated selector switch to rapidly change from semi to full-automatic firing. It universally fits all MAG and M240 variants, is interchangeable with the push of one pin and requires no significant additional training.

With the ability to switch between semi and full-automatic, the warfighter can engage single targets or recon by fire.

This unique battlefield advantage allows the user to have single shot accuracy and conserve ammunition. It also provides the gunner the ability to switch between the role of machine gunner and rifleman. These options broaden the strategic and tactical options and provide distinct battlefield advantages.

To ensure combat reliability, we put the trigger pack through rigorous testing:

- **Endurance test** with 10,000 rounds fired in full and semi-automatic modes without failure.
- **Drop test** at all angles from 2 meters. Sear stayed engaged regardless of shock to the system.
- **Selector resistance** remains constant after endurance testing of 10,000 rounds.
- **Trigger Pull** remains positive to mil-spec after endurance tests.

To request a quote or proposal for US or International tenders, please call **440-285-3481**.
• **.50 M2HB QCB**

The M2 QCB offers the same protection and capabilities that the classic M2 Heavy Barrel offers. It has the same cyclic rate (450 to 550 rpm), effective range (7,400 yards) and ease of maintenance.

What sets the M2 QCB apart is the highly reduced barrel change time. The system’s preset head space settings can mean precious rapid response time under fire once the barrel reaches “hot gun” status.

*Eliminate the risks and casualties from improper headpace and timing with OOW’s M2QCB .50 Caliber Heavy Machine Gun.*
The M2HB .50 caliber is one of the specialties of Ohio Ordnance Works, Inc. (OOW). Constructed to exceed military expectations and quality standards, each weapon is built with individualized attention to detail and multi-level inspection of quality.

Since the Second World War, the United States has had versions of the M2 in service in a variety of roles including aircraft guns, anti-aircraft defensive guns, tripod-mounted infantry guns and dual purpose anti-aircraft and anti-vehicular weapons.

The M2HB will out perform all your current heavy weight machine gun, anti-vehicle, and force protection needs.

Non-Firing Replica Firearms

Non-guns/Dummy Guns
Non-firing replica firearms by Ohio Ordnance Works, Inc. Each firearm is designed, intended and built to be non-functional for display and presentation purposes: whether for a salesperson who needs a display but doesn’t want the hassle of NFA paperwork, or for teaching, training and instruction on different systems, OOW’s replica firearms are the perfect fit. Available models include M4/AR15, AK47, M249, M240, M2 .50 and MK19. Quantity pricing available. Some models patented by OOW.

To request a quote or proposal for US or International tenders, please call 440-285-3481.

Many weapon systems available - call for details.
• OOW240/OOW249 Dual Purpose Mount

OOW exclusive Dual purpose cradle comfortably mounts OOW240, OOW249, M240 or M249 with no modifications. Cradle features 7.62 ammo can holder and 5.56 (.223) M249 Battle Pack holder. Please specify adapter style: .30-50 (small pintle) or Standard (large pintle). Choose between a Parkerize Grey or Desert Tan powder coat finish. Weighs only 11 pounds. No assembly required.

Two pintle sizes available (small and large). Please specify when ordering.

An M240 setup for right hand feed is required with this mount. Parts to facilitate right hand feeding available from OOW. Call for details.
• **M192 Tripod Mount**

The M192 Lightweight Ground Mount is a tripod used in the field by the United States Armed Forces. It was designed for use with the OOW249, OOW240B, OOW240E6, M249, M240B, and the M240E6 weapon systems.

The mount is compact and collapsible with an integrated traverse and elevating mechanism. It weighs 11.5 pounds and is easy to emplace and engage targets.

13001669 .................................................................. Call for Quote
To request a quote or proposal for US or International tenders, please call **440-285-3481**.

M192 weighs only 11.5 lbs. without gun attached and folds up to an easily portable, compact size.
**MK 93 Mount**

The MK 93 mount is a dual purpose mount for the M2HB .50 caliber Heavy Machine Gun and the MK19 Mod3 grenade launcher.

The mounting system is designed for use with a vehicular mount or tripod and uses hydraulic buffers that allow for easy control of the weapon.

The MK 93 requires no external adapters or tools to mount either weapon system, making change-over much easier.

The mount comes with small and large pintle, ammo can bracket, ammo can and manual.

Ohio Ordnance Works, Inc. (OOW) is proud to offer a full service, arsenal level repair division. We specialize in the repair of past and current military small arms up to, and including, the M2 .50 caliber machine gun. We supply new MIL spec, new old stock, and Grades A & B used parts. OOW can also manufacture some of those hard to find parts.

When received, all weapons are inspected according to our ISO 9001:2008 standards, and then repair/rebuild is quoted based on time and material. All repairs are pre-authorized by the customer. The weapon is test fired to verify the correct function of the repair, then cleaned and final inspected. Every weapon that comes into our facility leaves in complete working order.

Some of the services that we provide include:

- TIG and MIG welding of receivers and parts
- Lathe work including single point thread cutting
- Manual Milling work
- Heat Treating and Tempering
- Magnaflux Inspection for cracks and defects
- Complete Rebuilds/Refurbishments
- Refinishing (Parkerizing, Black Oxide, Bluing, etc.)
- Gaging and Headspaceing

All repairs come with a One-Year Guarantee on parts and labor. This guarantee excludes any customer modifications or repair attempts as well as the use of improper ammunition.
Firearms Training and Instruction

Ohio Ordnance Works, Inc. (OOW) offers training services for both individuals and classroom sized groups. Training is available for any weapon system and features both Operator and Armorer Level courses.

Classes normally take two days of classroom instruction and one day at the range. Length of classes may vary depending on group size and type of instruction.

Some areas covered in the Operator Level Training include:

- Major Components
- Equipment Data
- Troubleshooting Procedures
- Field Stripping & Reassembly
- Cleaning
- Ammunition
- Front Sight Adjustment

Some areas covered in the Armorer Level Training include:

- Major Components
- Equipment Data
- Disassembly & Reassembly
- Inspection & Repair
- Function Testing
- Cleaning
- Stoppage
- Testing
- Using the Tech Manual

Call for quote and to schedule your training.
