Industry

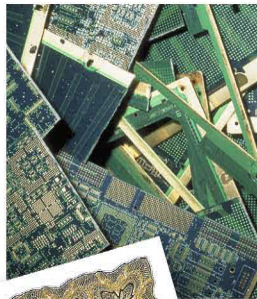

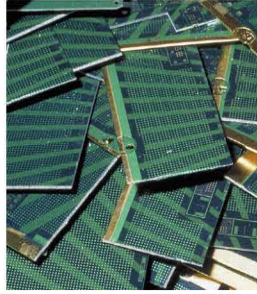

**Metallic Resources
PCR Division Recycles**

- Unpopulated scrap printed circuit boards and trim
- Gold reclamation of gold fingers, trim, pins, connectors, etc.
- Scrap copper laminates
- Scrap copper filters
- Scrap copper anodes/nuggets
- Scrap aluminum entry sheets
- Scrap silver film
- Other miscellaneous items

Environmentally Responsible Recycling

Unpopulated scrap printed circuit boards and trim are 100% recycled. Once your material completes the recycling process Metallic Resources, PCR Division issues you a recycling certificate stating your company's name, type of material, net pounds recycled and date received.

Your Complete Gold Reclamation Center

- Material for gold reclamation is carefully reviewed for exposed gold only. That portion of the material containing exposed gold will be processed.
- The material is then processed by individual customer. We do not blend customers together.
- Samples of each customer's solutions are taken and sent to a third party for analysis.

Customer Advantage

- The customer is only charged for the material being processed with exposed gold.
- The customer receives a greater dollar return for the pounds processed.

Other Materials Recycled and Purchased

- Scrap aluminum entry sheets
- Scrap copper laminates, anodes, nuggets and filters
- Scrap silver films
- ...and other items

A Full Range of Services To Make It Easier

- Palletized Gaylord Boxes for the proper collection, sorting and transporting of your material.
- Provide scheduled pick-ups of the scrap – “We Pay The Freight!”
- Certification that your material has been properly recycled.
- A staff of trained customer service representatives to keep you aware of the latest RCRA/ EPA Regulations.
