

• M240 SLR

requires shipment to FFL

Ohio Ordnance Works, Inc. is pleased to offer our unique, re-engineered, patented, belt-fed, semi-automatic version of the M240 machine gun. Delivering up to minute-of-angle (MOA) accuracy, high capacity, and proven durability, this weapon is ideal for situations which require highly accurate, sustained, controlled fire.

The M240-SLR is dimensionally identical to the M240, and is able to integrate into any M240 mounting system. The most noticeable difference between the M240-SLR and the M240 machine gun is that the SLR fires from a closed bolt. Many of the internal parts of the firearm have been redesigned, introducing an entirely new breed of M240.

The bolt and trigger groups are new and not interchangeable with the original M240. These new internal parts are all manufactured by OOW at our ISO certified facility where we are able to ensure that quality meets our stringent standards.

While the internal mechanism of the firearm has been redesigned, we've kept it simple. The M240-SLR requires only two tools to break it down. All other actions such as barrel changing, loading, feed cover functions, etc. remain the same as the original M240.

In field tests, using match ammunition, a randomly chosen weapon easily produced minute-of-angle groups at 100 yards. In both single and rapid fire (400 rpm) tests, absolutely no malfunctions were experienced with the gun ... a true testament to its superb engineering.

Firearm includes: (2500) M-13 Links, Cleaning Kit, Parts Pouch, Sling with Hook Assembly, Regulator Scraper, Plastic Lubricant, Needle Nose Pliers, Brass Hammer, Spanner Wrench, Combination Scraper Tool, Assembly Tool, Safety Glasses, Ruptured Cartridge Case Extractor, Front Sight Combo Adjusting Tool, Disassembly Tool, Operating & Technical Manual, M240 Custom Cut Hard Plastic Case.

Specifications

Caliber	7.62 x 51mm
Finish	Phosphate
Operation	Closed bolt, semi-automatic.
Feed	M-13 Links
Weight Empty	24.2 pounds
Length Overall	47.5 inches with flash hider.
Barrel	Four grooves with a uniform right hand twist of one turn in 12 inches.
Barrel Length	20 inches
Sights	Open adjustable iron.

"...a semi-automatic only version of the M240B that meets and exceeds all BATFE regulations for firearms of this type..."

Shotgun News, M240-SLR: A Satisfying Substitute. February 2009 by Peter G. Kokalis

"When the terms 'Belt-fed' and 'Minute of Angle' actually meet in the same sentence, it is unlikely the firearm discussed is anything other than the OOW M240 SLR."

Small Arms Review, The M240 SLR from Ohio Ordnance Works, Inc. Infinite Capacity. Surgical Accuracy. February 2009 by Jeff W. Zimba

"It came as no surprise that no malfunctions were experienced with the M240 SLR and with proper ammunition and gas setting, as well as normal cleaning and lubrication, I can't imagine one having a single malfunction with it during a lifetime of shooting."

Special Weapons, Ohio Ordnance M240-SLR. The World's Most Popular Medium Machine Gun — 1-MOA Accurate. October 2008 by Gary Paul Johnston

"is available to civilian shooters who want to experience the impressive performance of our military's M240 "Bravo"—granted without full-auto capability, but also without the cost and paperwork hurdles that must be overcome to obtain a machine gun."
