Swisstrax is the modern alternative to concrete and epoxy flooring. It is the perfect solution to enhance the look of your garage and can be installed within hours! Our modular floor system is eye-catching, easy to install, easy to maintain, and backed by a 15 year warranty. Cover up flooring imperfections such as cracks, stains, lifted epoxy spots or just plain old boring concrete. Whether your garage puts up with snowy winters or blistering hot, humid summers, we have a tile style that will fit your needs.

Our flooring tiles are chemical resistant to any fluids you will find in a residential garage (oils, hydraulic fluids, radiator coolant, etc.) With 5 different styles to choose from and up to 19 different colors, you can customize your garage and be the talk of your block.
