

Ribtrax+

In just a few hours ... this could be your garage floor!

The **unique open profile** cross action design of the **Ribtrax** tile has made it the most popular tile in our entire collection. It has earned its place as the most versatile and durable tile for many reasons, including its ability to withstand extreme and adverse elements. A **striking look** paired with easy maintenance makes **Ribtrax** the premier choice for Commercial and Residential applications alike – including garages, event floors, workshops, aircraft hangars, gyms, and patios in any climate condition. The **overall strength** and design of our **Ribtrax** tiles allows for heavy items such as rolling creepers, jack stands and tool boxes to sit and easily maneuver across the floor.

Ribtrax, a 15.75" x 15.75" tile, boasts **19 brilliant colors** that can be mixed and matched in a design to give a brilliant customized style to any setting. **Ribtrax's** open profile above and advanced channel system below, allows for an **easy-to maintain floor** that facilitates optimum drainage underneath the tiles. The 0.75" height coupled with the cross-directional perforated design will also hide the undersurface of the tile beautifully. **Peeling epoxy, chemical stains or just plain unsightly concrete becomes an image of the past.**
