

FLEXI®-Shoreline

KBI Flexi®-Shoreline is tested and proven to preserve the structural integrity to the water's edge, protecting the shoreline from erosion. The structural material, consisting of wire-free recycled tire granules, rock aggregate and KBI's proprietary binding agent, is designed to attenuate wave action while protecting natural drainage patterns to secure and stabilize at-risk shorelines. KBI's shoreline stabilization system can be fully-customized for small and large scale projects. KBI Flexi®-Shoreline provides environmental and economic sustainable solutions to reduce shoreline and coastal erosion problems and foster marine growth.

● KBI Flexi®-Shoreline benefits

- Diffuses wave force
- Reduces shoreline erosion
- Preserves natural drainage patterns
- Protects sensitive plant and animal habitat
- Combats rising water levels due to climate change

● KBI Flexi®-Shoreline value

- Preserves waterfront property value
- Reduces total cost of ownership (TCO) over lifespan
- Reduces regular maintenance costs and storm damage repairs
- Ensures compliance with shoreline protection regulations
